Petitioner respectfully disagrees with the Examiner regarding the obviousness-type double patenting rejection given in the Office Action dated October 11, 2005. This Terminal Disclaimer is being filed for the sole purpose of advancing the prosecution of this case.

Petitioner hereby disclaims the terminal part of the term of any patent granted on the above-identified patent application which would extend beyond the full statutory term of U.S. Patent No. 5,747,001. In addition, Petitioner hereby agrees that any patent so granted on the above-identified patent application shall be enforceable only for and during such period that the legal title to U.S. Patent No. 5,747,001 shall be the same as the legal title to any patent granted on the above-identified patent application, this agreement to run with any patent granted on the above identified patent application and to be binding upon the grantee, its successors, or assigns.

In making this disclaimer, Petitioner does not disclaim any terminal part of any patent granted on the above identified patent application, prior to the full statutory term of U.S. Patent No. 5,747,001 as defined in 35 U.S.C. §§ 154-156 and 173, in the event that U.S. Patent No. 5,747,001 expires for failure to pay a maintenance fee, is held unenforceable or is found invalid in a final judgment by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. § 1.321(a), has all claims canceled by a reexamination certificate or as a result of an interference proceeding, or is otherwise not deemed to provide the rights conveyed by 35 U.S.C. § 154, prior to the full statutory term of U.S. Patent No. 5,747,001 as defined in 35 U.S.C. §§ 154-156 and 173, except for the separation of legal title stated above.

Further, Petitioner does not disclaim any terminal part of a patent granted on the above identified patent application that would extend beyond the present termination of U.S. Patent No. 5,747,001, in the event that such present term is extended by virtue of compliance with the conditions for term extension of any present or future patent term extension provisions of the patent law, including but not limited to 35 U.S.C. §§ 155, 155A, or 156, and without waiving Petitioner's right to extend the term of a patent granted on the above identified patent application to the extent provided by law.

The undersigned, being the Attorney of Record for the above identified patent application, and duly authorized to act on behalf of Petitioner, certifies that she has reviewed the Assignments attached as EXHIBITS 1-7, and to the best of her knowledge and belief, legal title to the above identified patent application and U.S. Patent No. 5,747,001 rests with Petitioner.

The undersigned declares that all statements made herein of her own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001, Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the above-identified application or any patent issuing therefrom.

Respectfully submitted,
